

Index of Word Roots

This Index of Word Roots points to the pages in the main body of the book where the roots of words are specified, the ones in bold font indicating the glossary, where more detailed etymologies are specified, wherever possible going back to Proto-Indo-European (PIE) roots. This Index, like the Glossary, is work in progress. There is still much work to do before we can define a coherent set of words that are based on the seven pillars of wisdom, rather than the seven pillars of unwisdom, on which Western civilization is based.

Index of References and Influences

This Index of References contains pointers to all the authors referred to in this book, together with the titles of their own books, articles, and other media. The page numbers marked with an *n* are pointers to references to the end notes. It is planned to add cross-references from these notes pages to pages in the main body of the book in due course, a considerable undertaking. This Index also includes references to influential figures in the history of ideas not directly associated with a particular work.

General Index

This General Index contains pointers to topics, subjects, concepts, sections, subsections, and all other key points not included in the Index of Word Roots and Index of References. Generating an index for all knowledge in all cultures and all disciplines at all times, past, present, and future, is one of the greatest challenges in writing this book, greatly testing the clarity of both the content and structure.
